

Processes and Procedures – 3 Elements Needed for Operational Success

Processes and Procedures Are Needed for:

- Training and understanding for successful operations
- Minimizes risk, accidents and unacceptable behavior
- Develops Internal Control Systems

FIRST Element: Obedience

SECOND Element: Persistence

THIRD Element: Cooperation

Obedience – Exodus Ch. 16

- Process: The Lord will provide what you need (albeit in unusual and unexpected ways).
- Procedure: You must listen and obey His instructions. Begin each day with the Lord.

Persistence – Exodus 23

- Process: Success comes little by little. God uses enemies and obstacles for your benefit.
- Procedure: Commit yourself to the Lord, serve Him only. Fight and drive out the enemy.

Cooperation – Exodus 24 and 32

- Process: Stay Put and Wait.
- Procedure: Destroy the people for disobedience and rebellion...however, God used the prayers of a person to show mercy, forgiveness and relented from destroying them.

Impatience and unbelief caused the people to sin. When we do not follow God's processes and procedures, it can be very costly and the implications can have a far reaching effect.
