Choices for Youth

Here are a few things to remember when purchasing a Bible for your student.

- Try and look for a Bible that they can use for years and not just right now (age graded study bibles tend to only apply for a couple of years at the maximum)
- Look into the version for how it was made, if it was made by a large committee of experts that's generally good, whereas if it was translated by one person it is not generally as reliable.
- Ask your student what they would like in their Bible.
- In addition to a bible, purchase your student a faith journal.
