

Greenville Lutheran Cemetery of
Immanuel Lutheran Ministries

Did you know?

- That about half of the Cemetery as it stands today was owned and considered the Town of Greenville Cemetery
- That in early 1930, Immanuel Evangelical Lutheran Church purchased the old town Cemetery from the Town of Greenville. No available records show the monetary transaction, but rumor is that it was sold for a single dollar
- That on Feb 24, 1930, the first meeting of the Cemetery Committee occurred with the following trustees elected; Julius Seifert, Emory Meltz, John Schuldt, Wm. Becker, Albert Meyer, Harry Nieman
- That today, there are approximately 1086 individuals buried within the Cemetery, of this, 588 have been buried in the Cemetery since January of 1930
- That approximately 212 individuals were buried in the Cemetery before 1900
- That the oldest burial in the Cemetery on record is Dr. W. Moor who died on July 23rd 1851
- There are over 300 gravesites still available, for either standard burial, cremation burial or inurnments.

The Cemetery Association is managed separately from the affairs of the church. Governed by State Statues, the Association manages the property and operates independently with elected trustees by the Church. Even though it's independent, the Church Leadership Team continues to oversee the election of trustees and other aspects of the operation of the Association.

The Cemetery is maintained and operates from the investments of the Cemetery Trust Fund (Care Fund), from memorials and donations. Additionally, all funds received from the sale of grave sites and cremation burials are invested into this Trust Fund.

If you are interested in the purchase of grave sites, see the website link to the Pricing Schedule. Within is a list of individuals you can contact for purchasing details.

If you are interested in donating to the Cemetery, you can do so by use of the envelope that is included in the giving envelope pack from church or by a separate envelope designated for the Cemetery. All donations will be used to cover operating costs. Additional funds will be saved in a contingency fund for grounds maintenance equipment.
