# illuminate

GOD WITH US

DECEMBER 1-4

SILVERDALEBC.COM/ILLUMINATE

## streaming instructions

### GETTING STARTED:

This guide is to give you an overview of the process and point you in the right direction. Feel free to test the streaming on your device during any of our Sunday morning live worship services. Please check your feed and allow the video to play for at least 10 minutes.

### THE PROCESS:

Use your internet provider and connect to your viewing device to watch The Illuminate Program in your home. Most likely, you are going to stream the event to your television, so we have provided two ways to do that with the instructions below. One way will be on the church website at <http://silverdalebc.com/illuminate>, and the other will be through our YouTube page at <http://youtube.com/silverdalebc>

**Smart TV:** This means your TV can view apps from the internet so that you can watch things like Netflix, Disney +, Starz, and YouTube. If you already have the YouTube app you are good to go. Open the YouTube app and type in the following phrase in the YouTube search bar Silverdale Baptist Church. If you have never used YouTube on your TV you will need to install the app, set up a user account, and search Silverdale Baptist Church in the YouTube search bar. Select the Silverdale Baptist Church YouTube channel. You should be able to play the content from that screen.

**Using a device like an Amazon Firestick, Roku, or Apple TV:** Each of these devices is a little different. The process is similar to a Smart TV. If you use one of these devices, you will be familiar with using apps to watch content. If your internet connection is working properly, type the phrase Silverdale Baptist Church into the search line of your web browser app to find the live stream.

**Using a Laptop:** You will need an HDMI cable to plug into one of your TVs' HDMI inputs and an ethernet cable plugged into your laptop. We recommend the laptop be hardwired to your router and to your TV for the best viewing experience. (If you don't have an ethernet cable available, you can still use your WiFi; however, you may experience some lag time and buffering in the livestream.) Open your browser and navigate to <http://silverdalebc.com/illuminate> or <http://youtube.com/silverdalebc>. From either of these sites, you will be able to watch the event.

If you have a problem viewing the stream, or you do not see the service as available, please feel free to refresh or reload your web page or YouTube app.
